Website Design

Why choose us for your website design? We care about your company and the image of your company. Your website will be professionally designed and will meet or exceed your satisfaction.

All of our website design packages include a one-year maintenance contract. We include this so you don't have to:

- Hire additional staff
- Learn website programming
- Find the time to update your website
- Spend extra money that isn't always readily available

We also believe that every company should have a million dollar look. All of our website design packages will have the same effort put into the design...110% minimum!

Below is the step-by-step process to your website:

- Website planning
- Content gathering
- Draft initial design
- Identify changes
- Draft revised design
- Identify final changes
- Create final draft (or repeat step 5 and 6 if necessary)
- Create the pages of the website
- Private launch of the website for client review
- Public launch of the website
- Update information as necessary

The design process should take about two to three weeks to complete and up to eight (8) more weeks to complete the rest of the website. eCommerce websites may take longer depending on the number of products and services offered.

We offer four website design packages to suit the needs of your company.
